

HOW TO VACUUM YOUR POOL

FIGURE 1

Attach vacuum hose and pole to vacuum head. Submerge unit in pool.

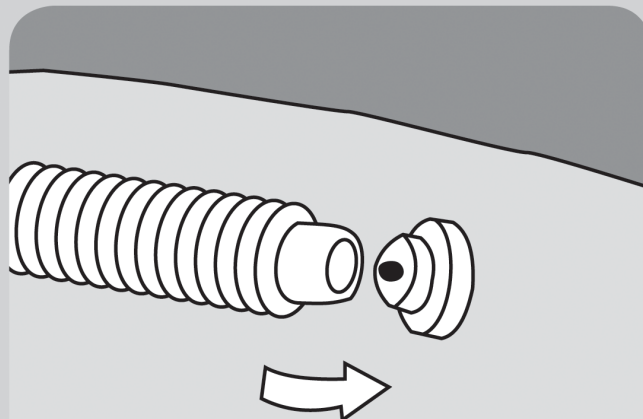

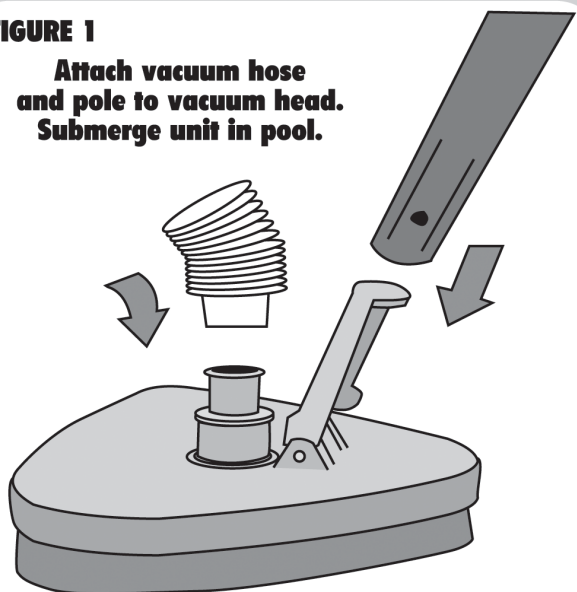

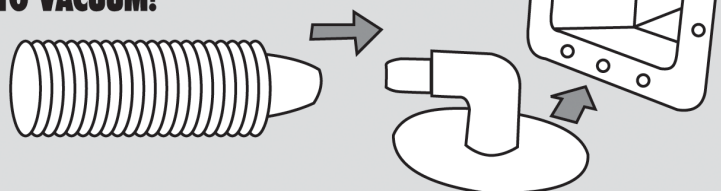

FIGURE 2

Hold other end of hose over water return. Hose will fill with water, driving out all air trapped in hose.

FIGURE 3

While holding hose below water, place the vacuum plate into the skimmer, leaving the leaf basket in place. Quickly attach hose to elbow fitting*. YOU ARE NOW READY TO VACUUM!

***NOTE: IF YOUR SKIMMER WAS NOT SUPPLIED WITH AN ELBOW FITTING, SIMPLY TAKE OFF THE SKIMMER COVER AND PUT THE VACUUM HOSE DIRECTLY ON TO THE VACUUM PLATE.**
